original release: *2012-06-17* | ID: *KB00073EN*

We provide a driver for QuataFire 610 / QuataFire XL for Windows Vista 32-bit. QuataFire 610 / QuataFire XL are not supported under 64-bit systems. Also there is no support for Windows 7/8. QuataFire 610 has been discontinued some time in 2007, QuataFire XL in 2008. The products are now considered legacy items and the ongoing driver development has been discontinued.
