Headphone output of MAYA44 USB+

original release: *2014-08-26* | ID: *KB00175EN*

We often get asked about the output signals the headphone output of our MAYA44 USB+ is sending out. The headphone output (available as a 1/8" connector) sends out the same signal as line output channel 1/2, making it independent from channel 3/4. This is great if you want to use MAYA44 USB+ in a computer DJ setup without the use of an external DJ mixer or a separate headphone amplifier.
