Miditerminal 4140

4 x 4, 64ch MIDI/SMPTE Interface

The Miditerminal 4140 is the full featured 4-in/4-out, 64 channel MIDI interface for those who need an economic PC/MIDI solution. The 4140 works with any PC. Just hook it up to your computer's printer port and you're ready to go. The Miditerminal 4140 uses a parallel port. The parallel type MIDI Interface has much better MIDI timing compare to USB type MIDI Interface. And if that isn't enough, the miditerminal 4140 also has full SMPTE time code capability. Read and generate al frame rates for the ultimate in accurate synchronization. The Miditerminal 4140 support ESI's unique and powerful driver technology for perfect compatability with Windows XP, 2000, ME, 98SE.
