

SW10K eXperience

Powered Studio Monitoring Subwoofer

A subwoofer is an essential ingredient for many monitoring setups. Although many studio monitors such as our nEar04, nEar06, nEar05 eXperience or nEar08 eXperience provide sufficient bass frequency response, adding a SW10K eXperience subwoofer will help you to provide a better picture of the low frequencies in your mix. Whether you are producing classical 2.1 sound or 5.1 / 7.1 surround sound productions, SW10K eXperience will easily become an important part of your monitoring setup. It's compact size (even smaller than its predecessor), yet powerful output will easily convince you. Please note that SW10K eXperience is no longer in production and has since been replaced by the newer aktiv 10s.

Features

- 10" bass reflex powered subwoofer
- amplifier power: 100W@100Hz, 4 Ohm, 0.1% THD
- subwoofer crossover frequency: 50Hz - 250Hz (adjustable)
- separate satellite output crossover frequency: 50Hz - 250Hz (adjustable)
- phase control
- inputs: balanced XLR, unbalanced 1/4" TRS
- outputs: balanced XLR
- input impedance: 20kOhm balanced, 10kOhm unbalanced
- foot switch input as mute control
- dimensions: 363mm(H) x 375mm(W) x 340mm(D)
- weight: ca. 15 kg
