

KeyControl 25 XL

25-key USB Mobile MIDI Controller

KeyControl 25 XL is a compact 25-key keyboard, perfect for live usage on stage and in studios. The new versatile MIDI controller can be used immediately after it has been connected to a sound device or to a computer. You can connect KeyControl 25 XL to your Macintosh or PC via a simple USB connection. No additional power supply is required, no drivers have to be installed.

KeyControl 25 XL offers numerous controllers: it has a pitch bend and modulation wheel, 4 knobs, a fader and various buttons. The 4 knobs can even be assigned twice, just switch between the two banks by pushing a button. Of course all controllers work in real time. If you are looking for a small and affordable controller keyboard and you don't need more than 25 keys, KeyControl 25 XL is the solution for you.

KeyControl 25 XL is no longer available and has since been replaced by KeyControl 25 XT.
