

KeyControl 25 XT

25-key USB Mobile MIDI Controller

Our KeyControl 25 XT is a compact 25-key keyboard, perfect for usage live on stage and in studios, featuring a stylish aluminium case. No extra power supply and no special drivers are needed when connected to your PC or Macintosh. All this makes KeyControl 25 XT a perfect mobile solution for modern musicians.

The versatile MIDI controller can be used immediately after it has been connected to a sound device or to a computer. The 4 endless encoders, the pitch bend wheel and the modulation fader allow you to control your software synthesizers directly from the keyboard. Of course all controllers work in real time. If you are looking for a small and affordable controller keyboard and you don't need more than 25 keys, KeyControl 25 XT is the solution for you.

If you are looking for a larger keyboard, you should check out KeyControl 49 XT and KeyControl 61 XT.
