

KeyControl 49+

49-key USB Keyboard Controller

KeyControl 49+ is the most cost effective MIDI keyboard for your home studio. With the 49 full-size velocity sensitive keys and the USB connection, KeyControl 49+ is the perfect master MIDI controller for computer based home studio environments.

The light weight keyboard can send all important MIDI messages via a simple user interface. You can connect KeyControl 49+ to your Macintosh or PC via a simple USB connection. No additional power supply is required, no drivers need to be installed.

Controlling MIDI based software such as famous notation or sequencing software like Cubase, Finale, Sibelius, Logic, Cakewalk or others could not be easier. If you work only with software synthesizers, KeyControl 49+ is the most simple way to control them in realtime. Plug-n-play in perfection!

In the European Union and other European countries, KeyControl 49+ is shipped and bundled together with the full version of Cubase LE 4 from Steinberg, the incredible multichannel recording software for Mac & PC. Please note that KeyControl 49+ is no longer available and has since been replaced by KeyControl 49 XT.
