

KeyControl 61 XT

61-key USB Keyboard Controller

The KeyControl 61 XT is a stylish 61-key aluminium case keyboard, perfect for usage live on stage and in virtually any studio environment. No extra power supply and no special drivers are needed when connected to your PC or Macintosh. This makes KeyControl 61 XT a perfect addition for every studio setup and in many other places.

The versatile MIDI controller can be used immediately after it has been connected to a sound device or to a computer. The 8 endless encoders, the pitch bend wheel and the modulation fader allow you to control your software synthesizers directly from the keyboard. Of course all controllers work in real time. If you are looking for a really stylish and yet affordable controller keyboard, KeyControl 61 XT is the perfect solution for you.

If you are looking for smaller solutions, our KeyControl 25 XT and KeyControl 49 XT are also available.
