

SW10K

Powered Studio Monitoring Subwoofer

A subwoofer is an essential ingredient for many monitoring setups. Although many studio monitors such as nEar05 eXperience or nEar04 provide sufficient bass frequency response, adding a SW10K subwoofer will help you to provide a better picture of the low frequencies in your mix. Whether you are producing classical 2.1 sound or 5.1 / 7.1 surround sound productions, SW10K will easily become an important part of your monitoring setup. Please note that SW10K is no longer in production and has since been replaced by the newer aktiv 10s.

Features

- 10" bass reflex powered subwoofer
- amplifier power: 100W@100Hz, 4 Ohm, 0.1% THD
- dynamic power: 120W
- crossover frequency: 50Hz - 180Hz (adjustable)
- inputs: balanced XLR, unbalanced 1/4" TRS
- outputs: balanced XLR
- input impedance: 20kOhm balanced, 10kOhm unbalanced
- mute control connector (for sustain pedal)
- dimensions: 384mm(H) x 354mm(W) x 384mm(D)
- weight: ca. 15 kg
