

aktiv 10s

Powered Studio Monitoring Subwoofer

Many monitoring setups contain a subwoofer as an essential ingredient. Although many studio monitors such as our aktiv 05, uniK 04 or uniK 05+ for example, provide sufficient bass frequency response for many applications, adding a aktiv 10s subwoofer will help you to provide a much better picture of the low frequencies in your mix. Whether you are producing classical 2.1 sound or 5.1 / 7.1 surround sound productions, aktiv 10s will easily and quickly become an important part of your monitoring setup. It's compact size with a stylish design, yet powerful output will easily convince you.

Features

- 10" bass reflex powered subwoofer
- amplifier power: 150W@100Hz, 4 Ohm, 0.1% THD
- subwoofer crossover frequency: 50Hz - 180Hz (adjustable)
- separate satellite output crossover frequency: @100Hz and flat (adjustable)
- phase control
- input level control
- power mode: standby and on
- inputs: balanced XLR, unbalanced 1/4" TRS
- outputs: balanced XLR
- input impedance: 20kOhm balanced, 10kOhm unbalanced
- foot switch input as mute control
- dimensions: 340mm(H) x 340mm(W) x 340mm(D)
- weight: 14 kg
