Why do I receive a Windows Security message?

original release: *2012-04-19* | ID: *KB00021EN*

While installing a driver or software from us under Windows Vista, Windows 7, Windows 8/8.1 or Windows 10, you might get a message like the following ...

... that notifies you, where the driver software you are installing is coming from. All drivers and software we provide have a certified signature that tell you they are coming from a safe source. Confirm this dialog with *Install*.

Please note that such a message can appear several times during driver installation.
