Where can I find the Windows driver for KeyControl 49+?

original release: *2012-04-30* | ID: *KB00049EN*

KeyControl 49+ does not not require any special driver for Windows XP, Windows Vista, Windows 7, Windows 8/8.1 oder Windows 10.

KeyControl 49+ is a so-called "Class Compliant" device which means that it works with the default drivers that are included in Windows. To use them, simply connect the keyboard with the USB port of your PC and you can start using it in your applications.
