Can I connect a guitar or microphone to Juli@ / Juli@ XTe?

original release: *2012-05-12* | ID: *KB00056EN*

Juli@ / Juli@ XTe provides analog line level inputs and outputs with +4dBu and -10dBV signal level. To connect a guitar or a microphone, you need to use a separate preamp or a mixing desk. This means that a direct connection of an electric guitar or microphone is not possible.
