Is the M4U XT driver multiclient capable?

original release: *2013-03-08* | ID: *KB00123EN*

Yes! Multiple applications can use M4U XT at the same time. This is a standard feature under Mac OS X and under Windows (XP, Vista, 7 und 8 - both 32- and 64-bit) our driver which is available on the download page is required for multiclient functionality.
