Can I use the different inputs of MAYA22 USB at the same time?

original release: *2014-08-20* | ID: *KB00164EN*

MAYA22 USB provides a microphone, a Hi-Z/instrument and a stereo line input. These different inputs can be used simultaneously, depending on the setting in the control panel software of the interface:

- *Line* - the stereo line input (RCA connectors on back) is used
- *Mic* - the microphone input (XLR connector on front) is used
- *Hi-Z* - the Hi-Z instrument input (1/4" connector on front) is used
- *Mic Hi-Z* - the microphone input (XLR connector on front) and the the Hi-Z instrument input (1/4" connector on front) are used simultaneously, where the first signal is recorded on the left input channel and the second signal on the right input channel
