Does KeyControl 25/49 work with Windows 10?

original release: *2015-09-15* | ID: *KB00238EN*

We do not offer Windows 10 drivers for KeyControl 25 and KeyControl 49 . The products have been discontinued several years ago, are now considered legacy items and the ongoing driver development has been discontinued. Some of our users however reported that our drivers for Windows 7 are also working under Windows 10. We encourage you to check this on your system, however we cannot provide technical support for this combination.

KeyControl 25 XL , KeyControl 25 XT , KeyControl 49+ , KeyControl 49 XT and KeyControl 61 XT are not affected by this and work with Windows 10.
