Can I use the inputs of UGM192 with line signals?

original release: *2020-02-09* | ID: *KB00279EN*

No. UGM192 provides a Hi-Z instrument input on the left channel plus an additional input for a dynamic or condenser microphone on the right channel. UGM192 does not provide a line level input. You can only connect instruments like electric guitars and microphones to the input.
