Bitwig Studio integration for Xjam

original release: 2022-12-08 | ID: KB00324EN

Xjam smoothly integrates into Bitwig Studio. With the release of version 4.4.2 of Bitwig Studio, Xjam easily finds its way into the Bitwig environment. When plugged in, Xjam is ready to use in no time and its 6 endless encoders will be automatically mapped to Bitwig Studio's Soft Controller assignment for immediate sound tweaking or parameter editing. Note, if you are using an older version of Bitwig Studio, please upgrade to version 4.4.2 at least.
