

U108 PRE: Readme

driver for macOS 11 Big Sur, macOS 12 Monterey, macOS 13 Ventura

version: 2.0.0b77 | date: 2022-10-27 | filename: U108_PRE-Mac-v2_0_0b77.zip | product: U108 PRE

ESI U86 XT / U168 XT / U108 PRE macOS beta driver

This is a beta driver supporting macOS 11 BigSur, macOS 12 Monterey and macOS 13 Ventura.

This means that certain limitations (see below) and possibly problems are to be expected. You can participate in driver testing to help our further development of this new driver platform that was developed from scratch to support macOS 11 BigSur, macOS 12 Monterey and macOS 13 Ventura. If you have any issues or you want to report something about our driver, you can send an email to info@esi-audio.com and/or contact our technical support.

release notes:

- this is a beta driver supporting macOS 11 BigSur, macOS 12 Monterey and macOS 13 Ventura
- works with Intel, M1 and M2 CPU based systems
- there is no control panel application included yet
- works with Audio MIDI Setup utility from Apple

important notice:

- in some cases after installation the output level is muted, to fix this move the level slider in Audio MIDI Setup as a workaround
